EDUCATION

California State Polytechnic University, Pomona

Aug 2025 – Expected May 2027

Master of Science, Information Security | GPA: 4.0 / 4.0

Pomona, CA

Coursework: Web Application Security, IT Auditing, Cloud Infrastructure, Software Defined Networks, Digital Forensics, Network Security

Mahatma Gandhi Institute of Technical Education & Research (MGITER)

Aug 2021 – May 2025

Bachelor of Engineering, Computer Engineering | GPA: 8.0 / 10

Navsari, Gujarat, India

SKILLS

Penetration Testing & Offense: Kali Linux, Metasploit, Burp Suite, Nmap, SQLmap, John the Ripper, Hydra, hashcat, Netcat

Defensive & Monitoring: Microsoft Sentinel, KQL, Splunk, Wireshark, Qualys VMDR, Nessus, NIST CSF, NIST SP 800-53

Compliance & Risk: Risk Management, Security Auditing, NIST AI RMF, EU AI Act, CCPA ADMT, Vulnerability Management

Digital Forensics: EnCase Forensic, Chain of Custody, Evidence Acquisition

Cloud & DevOps: AWS, Azure, GCP, Databricks, Docker, Kubernetes, REST APIs, Git/GitHub

Programming & Scripting: Python, SQL, Java, C, Bash, PowerShell, Shell Scripting

Networking: TCP/IP, Firewalls, VPNs, Routers, Switches

Tools: Microsoft Office Suite, Excel, Power BI, Postman, Confluence, WordPress

EXPERIENCE

Cyber Security Analyst

Jan 2024 – Jun 2025

PixEdge Systems

India

- Managed vulnerability remediation using **Qualys VMDR** and **Nessus** for BFSI and healthcare clients, prioritizing findings by severity, exposure, and business impact to raise quarterly SLA compliance from **71% to 95%**
- Tuned **Microsoft Sentinel** detection rules using **KQL** to reduce false-positive alert volume while preserving detection coverage for genuine threats
- Investigated a suspected **credential compromise** by correlating login patterns, source IP, and device behavior; coordinated with the identity team on password resets, session revocation, and Conditional Access review

Network & IT Support Assistant

Jun 2023 – Dec 2024

MGITER – IT Department

Navsari, Gujarat, India

- Managed and monitored campus-wide network infrastructure of **10+ routers, switches, firewalls, and VPN gateways**, ensuring secure and reliable connectivity for **1,200+ students and faculty**
- Conducted packet capture and analysis with **Wireshark** to identify and mitigate security issues, improving network uptime by **20%** and reducing unauthorized login attempts by **15%** through VPN setup, firewall configuration, and access control management

ACADEMIC PROJECTS

Physical Security Audit – Student Data Center | NIST SP 800-53, Audit Reporting, Risk Analysis

Cal Poly Pomona

- Conducted a physical and operational security audit of a student-run data center, evaluating **access controls**, environmental safeguards, backup resilience, and change management
- Mapped findings to **NIST SP 800-53 Rev. 5**, identified **5 audit exceptions**, and produced a formal audit report with risk-based recommendations including DR testing and AD/NAS separation

AI Regulatory Compliance – Cloud Provider GRC Study | NIST AI RMF, EU AI Act, CCPA, AWS, Azure, GCP

Cal Poly Pomona

- Developed an **8-category AI GRC framework** mapping requirements from **NIST AI RMF**, **EU AI Act**, and **CCPA ADMT** to evaluate regulatory compliance capabilities across AWS, Azure, and GCP
- Identified **Microsoft Azure** as the overall leader in compliance tooling integration; produced a formal research paper with provider-specific recommendations presented to faculty

Red Room – TryHackMe Penetration Test | Nmap, LFI, Hydra, Hashcat, Privilege Escalation

Cal Poly Pomona

- Exploited a **Local File Inclusion** vulnerability by reverse-engineering a regex-based input filter via the `php://filter` wrapper, then recovered a password seed from exposed `.bash_history`
- Mutated a targeted wordlist with **hashcat** and cracked SSH credentials using **Hydra**; caught a cron-triggered reverse shell via Netcat after abusing an append-only `/etc/hosts` for DNS redirection
- Escalated to root by **recompiling a CVE-2021-4034 (PwnKit) exploit** to retarget a misplaced SUID binary, patching and rebuilding the exploit source to match the target path

Forensic Disk Acquisition | EnCase Forensic, Write Blocker, Chain of Custody

Cal Poly Pomona

- Performed a forensically sound acquisition of a physical hard drive using a hardware **write blocker** and **EnCase Forensic**, preserving evidence integrity throughout
- Generated and verified **MD5/SHA1** hash values to confirm bit-for-bit acquisition accuracy, and documented full **chain of custody** from seizure through evidence storage

LEADERSHIP

Webmaster, Board Member

May 2026 – Present

FAST – Forensics & Security Technology Club, Cal Poly Pomona

Pomona, CA

- Manage and maintain **cppfast.org** on **WordPress**, enforcing **Information Security best practices** – access control, security patching, and regular backups; resolved a **3-year stale events calendar**, incorrect board listings, and missing member conversion flows

CERTIFICATIONS

CompTIA Security+ (Sep 2026) | AWS Certified Cloud Practitioner (Apr 2026) | IBM Cybersecurity Analyst Specialization | Google Cybersecurity Specialization | Digital Forensics, Incident Response & Cloud Security (TryHackMe) | IELTS: Band 7.0
